Hi Cassandra,

Thanks for getting back to me so quickly; I really appreciate it. We are discussing the overall project purpose statement for the delta conveyance project with the Corps. One of the difficulties is that the term "CM1" is being used in the overall project purpose statement but the description isn't complete. Then it is not clear exactly what the Corps is concurring with in the overall project purpose statement that DWR proposed. One of the things I'm curious about is whether or not CM1 will include a scenario for operations that is different from February 2012?

Can you share the description/definition of CM1 with us when it is complete?

Thanks again for your help this morning.
Erin

Erin – They are still updating the description because the agencies are still working out the operations for alternative 4 of CM1. I don't know that the purpose and problem statement descriptions will change

much, it will mostly be changes to Alternative 4 in the EIR/S. This alternative will have the new operations and updated facilities (e.g. 3 intakes and gravity flow) from the July announcement.

Thanks, C.

Hey Cassandra,

Thanks for your help. I have the February version from the BDCP website. I was hoping you had a description of CM1 after the July announcement. I appreciate your help,

Thanks,

Erin

Erin – No problem. I've asked Jessica to pull out the descriptions from the BDCP and the BDCP EIR/S. She's going to send you descriptions from the February version, but we will see if we can follow-up with something more recent, since there have been changes to the operating scenarios for CM 1.

Thx, C.

Hey Cassandra,

Do you have a written description/definition of conservation measure 1 that you can share with me?

I hope all is going well,

Erin
